

Wave Streetcar Permit Review:

To ensure that proposed work does not conflict with the Wave Streetcar's plans or construction, the City of Fort Lauderdale is requesting all work within the Wave Streetcar's influence area to be reviewed by the Wave Streetcar team. The Wave Streetcar's scope includes underground work, track and station installation, overhead wire installation, and other miscellaneous improvements. Construction of the Wave Streetcar is expected to begin in early 2018. The Wave Streetcar will be open to the public in early 2021.

The Wave Streetcar review is not intended to add additional time to the permit review. Reviews for streetcar conflicts will be expedited to ensure minimal delays occur for the applicant.

Please contact Alexandra Saiz, the City's Project Manager, to facilitate the Wave Streetcar's review.

About the Wave Streetcar:

The Wave Streetcar is a 2.8 mile modern public transportation service, powered by battery and electric sources, which will run along a fixed rail. The streetcar system will be designed to move people in and around downtown Fort Lauderdale.

The Wave Streetcar will begin with a 2.8 mile route, spanning the New River to connect the hospital and courthouse districts to the south with the downtown business core and government, education, shopping, recreation and entertainment to the north. The Wave Streetcar will serve as a circulator/distributor system, with connections to a regional bus and rail systems. Extensions to the Broward County Convention Center/Port Everglades and the Fort Lauderdale-Hollywood International Airport are in the planning process.

The City of Fort Lauderdale is a project partner along with: Broward County, the Broward Metropolitan Planning Organization (MPO), the Downtown Development Authority (DDA), Florida Department of Transportation (FDOT), South Florida Regional Transportation Authority (SFRTA), and the US Department of Transportation's Federal Transit Administration (FTA).

For more information on the project, please visit www.wavestreetcar.com.
